## Our Assessment Expertise

From test design, development and delivery to customer support with the WebXam testing system, our team is here for your assessment needs. Using proven analytical practices, subject-matter experts, and content standards regulated by a governing body, CETE Assessment Services guides the creation of item banks for personnel selection, credentialing, and the measurement of competency for Ohio Career-Technical Education centers.

- item-bank development & validation
- psychometric item analysis
- test development & deployment
- item bank maintenence

WebXam
Assessment Delivery

WebXam™ is a secure online assessment tool maintained by CETE. Designed to administer tests across the Ohio Career-Technical Education programs, it allows for better security of assessments and student information, and allows teachers to maintain student records, review testing reports, and provide immediate feedback on scores. WebXam™ also hosts exams for certification programs nationwide.

Our experienced customer support team is available via email or phone for any questions about the system that may arise.

For more information, please email us at **webxam@osu.edu**.

Customization and Consultation

CETE staff can develop customized solutions using marketability and recognition, alignment to curriculum, technical quality of the standards or certification assessments, usability in employment or educational settings, and the benefits and potential consequences of using certifications.

We also offer consultation on the development, administration, and maintenance of assessment systems for clients who have the capacity to self-execute assessment systems. Our experts assist clients by providing information and strategies that aid in avoiding potential pitfalls and in achieving maximum effectiveness and validity from their evaluations.

Assessment Professional Development

Educational Tools

CETE Assessment services offers access to learning modules and educational tools to teachers and administrators to improve test creation skills, learn how to utilize WebXam, and prepare for being a subject-matter expert for workshops. To learn more, visit: **u.osu.edu/ceteassessment/**.

Test Development Workshop

The Test Development Workshop is our 3-day flagship learning event to teach others how to create tests of occupational knowledge and skill. This and other professional development programs can be customized and delivered to fit your needs at CETE or at your site.

Learn more about CETE's Test Development Workshops at: **go.osu.edu/TDW**.
